**ICP Dean’s Annual Report (2020-2021)**

2020 when we all met at Agra for the 75th APICON we never imaged that a small tiny RNA virus SARS-COV-2 would invade our lives and change them permanently. Now we have three eras BC - Before COVID-19, DC-During COVID-19 pandemic and AC - After COVID-19 pandemic. Currently we will remain in DC for a while with a high probability that COVID-19 will be endemic. The Jaipur venue has moved to 2022 but learning in the new age e-medicine has no barriers. Technology has allowed us to suddenly work from home except hospital based care. Chronic medical care and office practice moved into a digital mode and virtual platforms have suddenly sprung up. However issues related to transparency, confidentiality and data protection especially in a third party space still need clarity. Indian government also launched a huge national digital health mission and e-sanjeevani app. COVID had ‘aryogya setu’ and now the ‘co-win app’ which all have being going through their learning curves. At API, ICP and PRF we revamped out website and the traffic on it showed an exponential rise.
Digital CMEs became the order of the day and Teleconsultation Guidelines in each domain are evolving rapidly. Each domain of medicine including critical care has an e-mode and remote connectivity has became a reality. ICP could not do our rural CMEs and CMEs in the medical schools which we had planned but I am sure our Dean Elect, Dr. Rajesh Upadhyay will allow us to continue our mission. ICP is actively now working on the following areas Psychiatry for Clinicians, Diabetes, Thyroid, COVID-19, Critical care and Adult Vaccinations with consensus and technical monograms. Reversal and prevention of NCDs like Diabetes, Hypertension, Coronary artery diseases especially via lifestyle has become very necessary. Adapting modern technology, artificial intelligence one can create digital health care ecosystems and deliver health care at home. Home based health care has become a standard now but eventually as we move into a vaccine mode in DC era hybrid models of care in health will evolve. Lifestyle is the key with clinical nutrition, physical activity, yoga as well as the Indian physicians need to recognize the Indian systems of medicine. Integrating ancient and traditional systems of medicine in an evidence based way is the new mantra. In pandemic times often science gets outpaced by rumours and social media fake news but the physician community was at the frontline reviewer to distinguish real evidence based facts from non-facts. Living in uncertainty, facing the unpredictable and fighting hardship I complement all my fellow brothers and sisters in health care and front line for risking their lives for the larger public good in times of this disaster. I bow down and pray to almighty to all our brothers and sisters who lost their lives during COVID-19 times that they attain sadgati, peace and their families can cope up with the grief.

I must thank our President Dr. Arulrhaj who wore multiple hats to fight the cause of physicians and Dr. Kamlesh Tewary, President Elect for a wonderful scientific program. I also thank Dean Elect, Dr. Rajesh Upadhyay and my outstanding Secretary Dr. Mangesh Tiwaskar who worked 24x7 for the organization. I must personally thank my mentor Prof. Siddharth N Shah for constantly advising me and hand holding me at each step with our Guru Dr. YP Munjal from Delhi. I have to thank our extraordinary Editor Dr. Milind Nadkar and his team for constantly printing JAPI and mailing it in this difficult time. My special thanks goes to Dr. BB Thakur, Dr. Pritam Gupta, Dr. GS Wander, Dr. AM Bhagwati, Dr. Agam Vora, Dr. Narayan Deogaonkar and every member of the faculty council, governing body and PRF. I thank Mrs. Sunita Shukla and her team at the API office for constantly working in this COVID times. I must personally thank our Mr. Harshanandan N Trivedi from Urvi Compugraphics and Mr. Anirudh Sapatnekar from One MD for ensuring print, web and digital connections were maintained at all times.

Virtual eApicon 2021 attempts to bridge gaps in medicine, discover and unravel Indian evidence, make in India discovery and hopefully will aid our clinicians to treat our patients better.
We are here to serve, care, share and learn to make the world a better place to live and stay healthy.
